

# AD-ACM707

## AD-ACM707 Car parking Gate barrier Automated high speed gate barrier room

Our series intelligent barriers use the international newest technical design and manufactured with precision machine tool. The automatic and intelligent barriers can be used convenient and safely added our the humanization clutch device and balance device.

### Specification:

AD-ACM02B Gate Barrier Specification	
Power Supply Input :	220V +/- 10%, AC 50/60 Hz
Max Straight Arm :	3 meters - 6 meters
Arm Speed :	1.2 sec—5 sec
Temperature :	-15 Celsius—60 Celsius
Relative Humidity :	< 90 %
Input Interface :	+12V level signal, or pluse width > 100ms pulse signal,
Transfer Interface :	RS485
Features :	Car hitting avoidance & Car striking Avoidance, Remote control, counter, Normally open/closed
